# 1. General information about synchronization

What is a readout?

A readout is the retrieval of the measurement data recorded by the easylogger using the mobile app or the desktop application.

When can I read out?

To enable a successful readout, Bluetooth must be activated on your smartphone / tablet. Furthermore, the easylogger must be "woken up" with a magnet (minimum holding power 1kg) and must be within range. To ensure a lifetime of up to 6 years, an easylogger "sleeps" until it is woken up.

General Terms and Conditions – Export sales

§1 General provisions
Our Terms and Conditions are an integral part of our contracts. Deviations are only binding if agreed in writing.

§2 Quotations
Our quotations are subject to change and are non-binding.

§3 Retention of title
The goods remain our property until full payment is received.

§4 Transport
Unless otherwise agreed, the goods are transported at the expense and risk of the customer. We select the most reasonable form of shipping and packaging.

§5 Delivery
The specified delivery time begins after receipt of conformation by the customer and is considered to be observed on the day of dispatch or the day the goods are ready for dispatch. Any modifications to the order cancel the delivery time and require for it to be reset.

§6 Warranty
We guarantee for the duration of 12 months that the goods conform to the descriptions provided and are not defective in that their functionality is neither nullified nor impaired. An insignificant reduction cannot be considered.
In the event defects occur during contractual use, customers must immediately – within 7 days at the latest
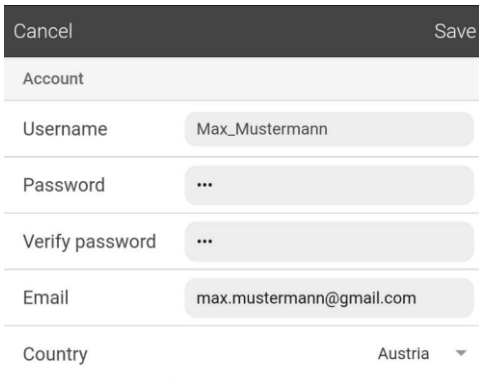

By clicking on the "Accept" button you accept our general terms and conditions and will be forwarded.

This button changes the language of the GTC's.

Here you can see our general terms and conditions of sale.

3. Creation of a Floorprotector user account (Continuation)
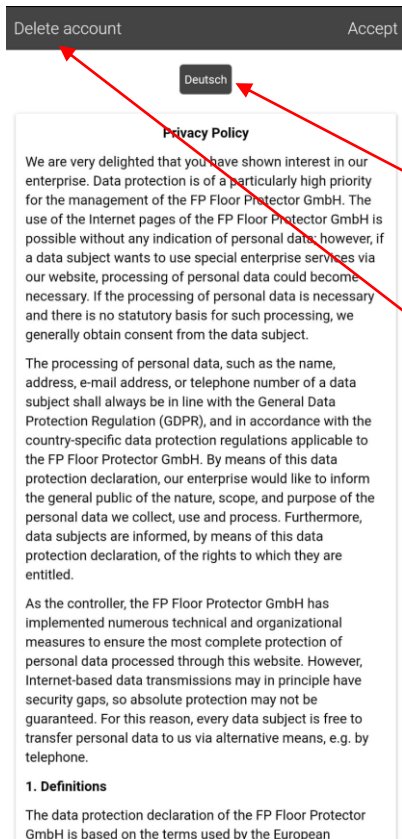

In this screen you must enter your account details.
