

1.0. General Performance

Long-term measurements of room climatic conditions with an Electronic Monitoring System, for example **fidbox® V6** (or equivalent), together with data recording. The placement of **fidbox® V6** (or equivalent) is in agreement with builder, including the necessary documentation (location and lot number of fidbox). Combined sensors measure at defined time intervals, temperature °C and relative humidity at floor level and in the substrate.

fp floorprotector GmbH, Außermanzing 28, AT-3033 Altllengbach,
Fon: +43(0)2774-29701 Fax: +43(0)2774-29709-19
email.: office@floorprotector.at – www.floorporotector.at

Electronic measuring device concealed on the bottom side of a floor panel for long-term monitoring of temperature and humidity in the installed floor. The location of placement of the **fidbox® V6** (or equivalent) is in direct coordination with the responsible project architect.

Product type: **fidbox® V6** (or equivalent)
Element size: 170 x 45 x 6 mm
Installation type: Adhesion in accordance with manufacturers' recommendations

1.0.2 Performance of Measurements

Performance of measurements; read out of the **fidbox® V6** (or equivalent) is done with the V6 Reader, including evaluation. The unit-price includes travel cost to/from, the evaluation report, for example, "Basic Report", including all documents that are to be sent. The invoicing for measurements occurs as per requested measurement for all built-in fidbox elements (or equivalent) installed in the project.
